Mayor's Forward
I am pleased to present to you the Darebin City Council, Community Health and Safety Achievements Report. This report documents the work undertaken by the City of Darebin in the areas of health, community safety and alcohol and drug harm reduction during 07/08.

Working to improve community health and safety is a key priority of Darebin City Council. The work undertaken in this area is guided by a number of key planning documents including the Council Plan 2005-2009, Community Health and Safety Framework 2005-2009 and the Community Health and Safety Profiles 2007.

The Community Health and Safety Unit works collaboratively with the Darebin Health Steering Committee, Darebin Local Safety Committee and the Darebin Alcohol and Drug Coordination Committee to develop policies and programs that work towards a healthier and safer community.

Key achievements over the past year have included the Good Food Alliance, development of a quick reference guide for alcohol and other drug services, implementation of the community initiated safety audit program and family violence initiatives.

Council has also been successful in grant applications through VicHealth in 07/08 which will result in some exciting developments over the next 2-3 years including the StreetSmart project which encourages physical activity amongst school children, further expansion of family violence initiatives and the development of a food security policy.

Council recognises the contribution and participation of community groups and organisations that make all the above mentioned work possible. We look forward to the challenges ahead in 08/09 and the work that we can all achieve together to achieve positive health and safety outcomes for all Darebin residents.

Regards

Cr Peter Stephenson
Mayor, Darebin City Council

Overview of the Community Health and Safety Unit

The Community Health and Safety Unit is located in the Communities and Culture Department and is responsible for providing a coordinated and strategic approach to health, safety and substance issues across the City of Darebin. This work is guided by a number of key planning documents including the Council Plan 2005-2009, Community Health and Safety Framework 2005 -2009 and the Community Health and Safety Profiles 2007.

The tasks undertaken by the Community Health and Safety Unit include a broad range of functions including developing and implementing policy, research and analysis of data, strategic planning, coordination of Council responses on local health and safety issues and coordination of local health and safety committees.

The work of the area is divided into three main strategic areas:

**DAREBINhealth**
The DAREBINhealth strategic framework identifies public health issues in the municipality, as well as outlines the programs and strategies Council will pursue to prevent ill health and enable people to achieve maximum well-being. This strategy fulfils Council's requirement under the Health Act 1989 to prepare a Municipal Public Health Plan.

**DAREBINsafe**
The DAREBINsafe strategic framework identifies community based initiatives that improve the perception of safety in Darebin.

**DAREBINsubstance**
The DAREBINsubstance strategic framework outlines Council’s response to drug and alcohol related harms in the local community.

The Community Health and Safety Unit works collaboratively with a number of external stakeholders, service providers and community groups to achieve positive outcomes in these three focus areas.
The City of Darebin would like to recognise the value of the collaborative work with our community stakeholders and look forward to strengthening these relationships in 2008/09.
Collaborative Projects

The Community Health and Safety Unit has been involved in a number of collaborative projects throughout the year including:-

- Community Health and Safety Profiles
- Partnerships with Neighbourhood Renewal Project
- Partnerships with Best Start
- Planning with Local Aboriginal Services
- Darebin Community Grants Program
- Preparation of Annual Strategies and Achievements Report

Community Health and Safety Profiles

The Community Health and Safety Profiles forms the evidence base for the local DAREBINhealth, DAREBINsafe and DAREBINsubstance annual strategy priority areas.

The profiles assists local agencies, government and our community to understand the factors influencing Darebin’s health, safety and wellbeing and to use this to plan and advocate on behalf of Darebin. The profiles report draws on a variety of data including:

- Demographic data
- Community consultations
- Service access information
- Perceptions of safety surveys
- Crime statistics
- Hospital attendance data and,
- Published articles and literature reviews.

DAREBINhealth Initiatives

Good Food Alliance
The Banyule Darebin Good Food Alliance, established in 2003, is a local coalition of agencies and residents addressing issues of local food security. Food security is defined as having access to healthy foods everyday for all of the community. The Alliance meets on a bimonthly basis in addition to holding a calendar of community and professional forums per year to learn from guest speakers and share information on local initiatives that address food security needs.

The Alliance is a joint initiative between Banyule City Council and Darebin City Council and is in partnership with a wide range of stakeholders including Darebin Community Health, Banyule Community Health, neighbourhood houses, local schools and community gardens.

Three forums were held this year all of which were well attended. The key topics presented in these forums were:

- **Access for all** - how easy it is for everyone to eat well?
- **Sustainability and gardening** - how in a time of decreasing water, energy and climate change we can continue to grow fruit, vegetables and other plants?; and
- **Children’s healthy eating** - initiatives that make it easier for kids to eat well.

Northern Healthy Cities Projects
The Northern Healthy Cities project was funded for two years through the Department of Human Services Good Practice Program. Seven municipalities in the Northern Metropolitan Region undertake a collaborative project aimed to assist local government to better understand the links between land use and health outcomes and more specifically, the concept of walkability - the extent to which the physical environment is conducive to people in the area walking for transport or leisure. The project was in three stages.

The **first stage** saw representatives from each Council attend the 2006 Healthy Cities short course run by Deakin University to provide an introduction to the links between health planning and land use planning using the World Health Organisation’s Healthy Cities Framework.
The second stage involved Deakin University undertaking an audit of each Council to provide a review of how walkability is being addressed by these local governments, the strengths and challenges faced as well as a set of indicators which could be used by the Councils to measure and benchmark the walkability of their geographical area.

The third stage of the project was completed in 2008. This stage involved a series of professional development workshops for Council staff by Deakin University around improving walkability in their municipalities. Staff from across Council attended and participant feedback showed increased capacity of Council staff to address walkability more effectively in future planning. Council continues to advocate for walkable neighbourhoods, recently signing the International Charter for Walking.

Planning for a Healthier North
Since early 2006, Council in partnership with Northern Health, have been leading a project called ‘Planning for a Healthier North’. The project has brought together health leaders from seven local government areas in Melbourne’s north to plan for a more integrated approach to health service delivery over the next decade.

This work has been in response to the Department of Human Services framework for the health system called Care in Your Community. The framework clearly articulates strong partnerships between the community sector and hospitals and draws on the importance of local government and its role in municipal public health planning. The framework provided an opportunity for Darebin Council and Northern Health to bring services together from across the northern region to better understand service demands. This work acknowledged from the outset health planning often needs to be done on a larger scale than municipal boundaries.

A series of workshops funded by the Department of Human Services have taken place since 2006 to support this work. Representatives in attendance ranged from the following sectors:

- Divisions of General Practice
- Primary Care Partnerships
- Local Government
- Hospitals
- Community Health
• District Nursing
• Mental Health Services
• Aboriginal Community Controlled Health Services
• Department of Human Services

There is now strong endorsement from the participating agencies to put resources towards continuing this work until 2010. The first step forward is the recruitment of an Executive Officer to set up a sustainable model for a Regional Integrated Planning Structure. Representatives from across the region will form a steering group to oversee this work. Financial contributions are now being sought from each of the participating agencies.

Suicide and Self Harm
Suicide and self harm was selected as an important research focus in recognition of high rates of suicide and self harm in Darebin when compared to the rest of Victoria. A research paper has been completed and comprises of three sections: a review of the literature pertaining to suicide and self harm; an analysis of the prevalence of self-inflicted injury within Darebin including a comparison between Darebin and the rest of Victoria; and a consultation with local service providers.

The paper recommends the research be used to contribute to local health planning, raise the issue of suicide and self harm in the local community, advocate for more resources and build linkages with mental health services for this important issue.

Scoping has been undertaken in partnership with the Northern Community Church of Christ to undertake a pilot project for people in Darebin to better understand the issue of suicide in our community. It is expected the pilot project will run in the 2008/09 financial year.
DAREBINsafe Initiatives

Darebin Graffiti Reduction Strategy
The Darebin Graffiti Reduction Strategy aims to minimise the impacts of graffiti in Darebin to improve public amenity and perceptions of local safety. The strategy is currently being redeveloped at Council under the new name of the Graffiti Management Strategy and is expected to be implemented in December 2008.

Outcomes of the Graffiti Reduction Strategy to date include the implementation of a graffiti subsidy program for private property owners in Darebin; the development of a strong partnership with the Reservoir Community Correctional Services Graffiti Removal Program and Victoria Police and the development of the Darebin Graffiti Reduction Working Group which is comprised of Council officers and external organisations who work together to manage graffiti.

Darebin Graffiti Reduction Subsidy Program
The Darebin Graffiti Subsidy Program was initiated in 2005 to assist residential and commercial private property owners in the removal of unsightly graffiti from their property. The purpose of the program is to build the capacity of the Darebin community to respond to the social problem of graffiti, and take responsibility for graffiti clean up in an effort to improve public perceptions of safety.

Through the program private property owners can apply to Council for either a graffiti removal kit containing a biodegradable solution and cleaning materials; a voucher for a four litre tin of paint, or a voucher for fifty dollars towards the cost of hiring a contractor to remove the graffiti. Property owners can apply for a subsidy once in any 12 month period or up to four times where the graffiti is deemed to be offensive. In 2007/2008 the Graffiti Reduction Subsidy Program was widely promoted and approximately 300 residents applied to Council for assistance in removing graffiti from their property.
**Graffiti clean up in Retail Activity Centres**

Council is committed to assisting Darebin traders in maintaining street amenity in Retail areas, and in cleaning up unsightly graffiti. As part of this commitment, during 2007/2008 Council assisted a large number of businesses in Fairfield, Northcote, Preston and Reservoir removing graffiti from commercial property through its Graffiti Reduction Subsidy Program, and partnership with the graffiti removal program operated by Reservoir Community Correctional Services. The graffiti removal program at Reservoir Community Correctional Services provides assistance in the removal of large amounts of graffiti by the use of biodegradable chemicals or by painting over graffiti.

During mid 2008 the City of Darebin plans to utilise funding provided by the Department of Justice to extend its assistance to traders in Darebin. Council will host one-off graffiti clean up events at retail activity centres in Northcote, Preston Central, and at a number of sites in East Reservoir.

**Road Safety**

Speeding and anti-social driving, particularly in residential streets, pose significant risks to the community and negatively effect people’s perception of safety. To address these two issues, Council has continued to implement the Not So Fast speed reduction program and the Anti-Social Driving Behaviour program.

The Not So Fast program places a speed advisory trailer in residential speeds to remind residents of the 50km/h default speed limit. This is supported by a mail out to residents about the program to enforce the speed limit message. Through the Anti-Social Driving Behaviour program, residents can report an incident of anti-social driving behaviour to Council, which will then be provided to Police.

In 2007 Council received 110 reports of anti-social driving from across the community which were individually investigated by police. The Not So Fast program ran in a number of streets across Darebin and in addition, the speed advisory trailer was used to reinforce the 40km speed limit around schools at the beginning of the school year.
Falls Prevention
Council recognizes that unintentional injury caused by falls is a growing problem in Darebin, particularly for the community’s older residents. In 2007/2008 the Community Health and Safety Unit was involved in a Foothold on Safety Program which was a community based program funded by the Department of Human Services, in partnership with Primary Care Partnership, that sought to minimize falls and reduce the number and severity of injuries of falls amongst older residents living in their homes.

During 2007 and in collaboration with community agencies involved in the Foothold on Safety Program, Council organized for a series of falls prevention educational stalls and informative sessions to take place throughout the community, such as at the Darebin Healthy Ageing festival, during Senior’s Week in Darebin.

Community Initiated Safety Audit Program
The Community Initiated Safety Audit Program was established in 2004 with the aim of creating safer environments in Darebin; maintaining community amenity, and strengthening community ownership of public spaces. A Community Safety Audit is a small group process, which brings a variety of people together to systematically examine the level of safety in a given area. Checklists and maps are used to identify issues of concern. In this way, peoples’ general unease in an area can be defined, and a specific solution can be passed on to the responsible Council departments, police, businesses and local agencies.

Four community safety audits were held in Darebin during 2007-2008 in Yarra Avenue, Strathmerton Street, Broadway and Summerhill Shopping Centre, Reservoir. Council was also heavily involved in undertaking Safety Audits in East Preston during 2007.
Council’s partnership with Neighbourhood Watch
Neighbourhood Watch is a police program that was established in Victoria in 1983 to encourage communities to take responsibility for their own safety, security and wellbeing. There are twenty Neighbourhood Watch areas in Darebin comprising approximately three hundred and fifty volunteer representatives.

During 2007-2008 Council and Neighbourhood Watch groups in Darebin collaborated on projects including the Smiles Campaign whereby smile signs were installed at locations around Darebin to encourage friendliness and perceptions of safety; Operation Bounceback which is a motor vehicle theft reduction project; the Darebin Street Parties Program; Walking events, and graffiti removal initiatives.

Darebin Street Parties Program
The Darebin Street Parties Program was implemented in 2007 during October, Community Safety Month to assist residents in hosting events with their neighbours, and to promote the concept of getting to know your neighbours as a community safety initiative. The program was made possible by the Neighbourhood Street Party Guide which was developed by the City of Darebin in partnership with the Darebin Neighbourhood House Network (DNHN), and is designed to help residents easily organise parties in local neighbourhoods.

During 2007/2008 Council assisted 13 residents in Darebin in hosting street parties with their neighbours as part of the launch of Community Safety Month. The Street Parties Program is expected to run again during the second half of 2008.
Community Safety Month
Community Safety Month is a Victorian Safe Communities Network initiative that is held annually in October and is coordinated by the Department of Justice. For over a decade the City of Darebin has supported this State Government initiative by coordinating a series of activities in Community Safety Month designed to encourage residents to get involved in programs that promote perceptions of local safety; and reduce crime, violence, injuries and emergencies.

Activities in the Community Safety Month 2007 program of events involved all Council departments and included Victoria Police, the Metropolitan Fire Brigade, Metropolitan Ambulance Service, Neighbourhood Watch and other community groups, local schools and business representatives.

The program attracted a great number of participants and comprised of events including the Darebin Street Parties Program; the Merri Creek Safe Stroll; the Edwardes Lake Safe Stroll; Good Neighbour Awards; Women’s Self Care Day; Walktober Walk to School Day; Safety Plate Day and Fire Safety and Injury Prevention Information Sessions.

Operation Bounceback
Operation Bounceback is a joint initiative between the City of Darebin, the National Motor Vehicle Theft Reduction Council and Victoria Police which aims to hit back at motor vehicle theft by educating the community and informing young people about the risks involved in engaging in motor theft.

The purpose of Operation Bounceback is to educate residents about small things that they can do to prevent having their vehicle stolen such as installing an engine immobilizer; removing valuables from the vehicle; and keeping the vehicle locked at all times. As part of the Operation Bounceback initiative in 2007/2008, Council and Victorian Police Crime Prevention Officers provided 100 Darebin residents with a free Australian Standards approved engine immobilizer and hosted educational stalls and information sessions at venues across Darebin including La Trobe University; Northland Shopping Centre; the Preston Market and Northcote Plaza.
Walking School Bus
The Walking School Bus Program is an initiative that promotes walking as the ideal mode of transport for primary school aged children to travel to school. The program operates in six local Darebin primary schools and involves trained volunteers collecting children from designated drop-off points and walking them to and from school. The program aims to assist children to get to school safely, conveniently and on time and participate in regular physical activity. During the 2007/2008 financial year, the Walking School Bus program supported five walk to school day events for Walktober to encourage children to walk to school and continued to support schools with Walk Once a Week (WOW) programs. The Walking School Buses continued to grow with 35 registered council volunteers "driving" 10 different walking school bus routes and over 115 children regularly walking to school as part of the program.

Partnerships to reduce and prevent Family Violence
Darebin Council believes in a community where respectful relationships between men, women and children are valued, and consequently expanded efforts this past year to reduce and prevent family violence. Council secured funding through the Helen Macpherson Smith Trust to work in partnership across the Northern Region on violence prevention initiatives and firmly embed this important issue at a Council, organisational and community level. Amongst the achievements is the development of the highly successful Women and Men’s Family Violence Help Cards, presently being translated into 22 languages.

Council also received funding through VicHealth to partner the Darebin Interfaith Council in developing a Declaration Against Family Violence. Faith leaders participated in family violence training and declaration workshops, with a special signing ceremony held on White Ribbon Day, November 25th, the International Day for the Elimination of Violence Against Women. Framed copies of the Declaration are displayed at faith organisations, as well as here at Council, providing a powerful statement to the community that violence against women and children is not acceptable. Council officers have also embraced the White Ribbon campaign by wearing ribbons and attending local and regional campaign events, organised for men, by men, to speak out against family violence.
DAREBIN substance Initiatives

Support for Families Experiencing Alcohol and Other Drug Related Harms
The impact of alcohol and other drug use on families was selected as a research focus in recognition of the prevalence of substance use in the Darebin community and the growing body of Australian literature examining the needs of families experiencing alcohol and drug related harm.

A research report has been completed and comprises three sections: a review of the prevalence of alcohol and other drug harms in Darebin; mapping of support services available to Darebin residents who experiencing alcohol and other drug related harms; and consultation with local service providers. The services and support groups included in the mapping task included those available to Darebin residents and not just services located within the municipality. It also included services and support groups addressing the use of various substances, including alcohol, tobacco, pharmaceuticals misuse, as well as services and groups focusing on illicit drug use, polydrug use and dual diagnosis.

The paper highlighted gaps in the service system and recommends that further advocacy work is needed to attract alcohol and other drug support services to the area. It also recommends a need to increase community access to information of the services that are already available to them. Initiatives addressing these recommendations will be scoped out in community health planning for 2008/09.

Alcohol and Other Drug Support Services, Quick Reference Guide
Council has developed a communication tool to enhance access to information on the alcohol and other drug support services available to families within Darebin. The Alcohol and Other Drug Support Services, Quick Reference Guide is a pocket-sized 'help card' which provides information on user- and family-based support services available to Darebin residents. It also includes contact details of additional services which may be of assistance including housing help, legal aid, suicide and family violence hotlines and referral services.

This initiative has been in response to the recommendations stemming from Council research on ‘Support for Families Experiencing Alcohol and Other Drug Related Harm’ and has
been developed in conjunction with the Darebin Alcohol and Drug Coordination Committee.

The ‘help card’ will be piloted across Darebin for a 12-month period. It is expected that the pilot project will run in the 2008/09 financial year. There is also strong interest to expand this project to a regional scale, with a view to collating the evidence collected to advocate for supporting the service system across the northern metropolitan region.

**Darebin Alcohol Accord**

The Darebin Liquor Licencing Alcohol Accord is an ongoing initiative of Council. The Accord draws together Darebin’s licensees of hotels, bars, licensed restaurants, licensed clubs, packaged liquor outlets, reception centres, and sporting clubs to address relevant issues with a combined and co-operative approach. It also provides an opportunity for local licensees, local government, the Police and Consumer Affairs Victoria to work together to address the impact of alcohol in the local community.

A series of Accord meetings have been held throughout 2007/08. The forums provided the opportunity to up-date licensees with topical information in relation to their own obligations under the *Liquor Control Reform Act 1998* and provide them with information on Council and police alcohol-related initiatives. Accord meetings have also provided Council with a valuable means of gaining an understanding of the local issues facing licensees, and have helped strengthen the connections between traders, police and Council.

**Packaged Liquor Advocacy**

In January 2007 Council lodged objections to two bulk discount liquor licence applicants on the grounds of ‘harm minimisation’. Council’s partners, Darebin District Police also lodged objections. One objection was successful and one was unsuccessful. This work has been part of the Darebin Alcohol Strategy 2006 and highlights the capacity of Council to develop structural responses that reduce or limit the harmful impacts of alcohol in the community. The work draws on our role under the Planning and Environment Act 1987 to assess planning applications and our responsibility under the *Liquor Control Reform Act 1998* to consider objections to liquor licence applications. Council will continue to monitor the number of packaged liquor outlets in Darebin and consider their impacts on the health of the community.
Forward Planning, Key Projects in 08/09

StreetSmart – Getting Children Active and Independent in their Neighbourhood
With Council receiving the last instalment of Walking School Bus funds in August 2007, we were pleased to be one of the six successful Councils to receive a three-year funding grant through VicHealth to develop a more comprehensive initiative aimed at getting kids active. We will partner with local primary schools, residents and local businesses in the Reservoir East and Preston East area of Darebin to deliver a number of travel behaviour change strategies aimed at getting children using active and independent modes of transport such as walking and cycling.

Food Access and Security Policy Development Project
City of Darebin has secured funding from the Department of Human Services North West Region, to develop a Food Access and Security Policy. This project has been in response to the growing issues of peak oil, climate change, water shortages and lifestyle choices and the growing impact on the cost, quality and accessibility of healthy food. The project aims to enhance Council capacity and mobilise cross-Council action towards improved food access and security across the Darebin municipality. This 12-month project is to be conducted under the auspice of the Darebin Banyule Good Food Alliance.

Liquor License Applications
There is growing concern about the proliferation of liquor licences being granted and its potential impact on alcohol consumption and associated health and social harms in the community. As local government has limited control over licensing decisions, Council is planning to undertake research on local harms to inform and support Council action regarding liquor license applications. This data will also be used to continue lobbying for increased involvement and participation from local government in State liquor licensing regimes.
Northern Interfaith Project – Preventing Violence Against Women.
We are delighted to have the opportunity to further our partnership with the Darebin Interfaith Council and scale up the Declaration Against Family Violence project to have a Northern Region focus. This is made possible thanks to a three year funding grant through VicHealth. We will partner the Centre for Dialogue at La Trobe University to engage the newly established Northern Interfaith Network, whose membership includes five Councils and key community organisations, to take on the challenge of developing preventative violence against women policy and practise in their faith organisations and communities.

Darebin Graffiti Management Strategy
Graffiti is a recognised problem in Darebin. As part of Council’s commitment to the management of unsightly graffiti vandalism across the municipality, and perceptions of public safety, Council’s Community Health and Safety Unit will be working to develop a Graffiti Management Strategy for the City of Darebin. The strategy will be informed by the views of external stakeholders, community groups and residents about how graffiti should be managed in Darebin, and will outline key priority areas for graffiti management and actions to be undertaken. The strategy will be supported by the Darebin Graffiti Management Policy, and will be produced in late 2008.
