

CAFE TO GARDEN PROGRAM

This café is taking part in Darebin's Café to Garden Program- offering customers and local residents free coffee grounds for their home compost and worm farms.

Rather than this café's coffee grounds going to landfill, they are opting to share the resource with the community.

Come and collect coffee grounds from us, to add to your compost or worm farm at home. Bring your own container or bucket, and check in with our staff.

Did you know that coffee grounds are a great source of nitrogen for your compost or worm farm? If recycled properly, they can nourish gardens as a rich plant food. Decomposition of organic waste in landfill produces methane, which has 34 times the greenhouse effect of carbon dioxide. Composting or worm farming coffee grounds is not only providing a garden fertiliser, it is also preventing air pollution and climate change.
