

FOOD WASTE AND COFFEE GROUNDS RECYCLING OPTIONS

FREE SERVICE

RESIDENTIAL GREEN BIN

If you only generate a small amount of food waste someone in your workplace may be willing to take this home and put it in their residential Green Bin. Most councils' residential Green Bins accept food waste.

PAID SERVICE

REGROUND

Collects coffee grounds and soft plastics. Waste education, audits, reporting and staff workshops are also provided and coffee grounds are delivered to home gardeners or community gardens.

reground.com.au

FREE SERVICE

PEELS

Free on-line match-making between people who have food waste and people who want it.

if you would like more information on organic waste recycling options.

FOOD WASTE AND COFFEE GROUNDS RECYCLING OPTIONS

PAID SERVICE

ON-SITE WORM FARM

You put your coffee grounds and organic waste into your own worm farm that is managed and stored by you on your property. The businesses participating in our worm farm trial recommend using the Hungry Bin Worm Farm, which can be purchased from wormlovers.com.au

ATTENTION! If managing your organic waste on-site you need to ensure that it is: free from odours and not placed near openable doors or windows; not attracting pests; and maintained in a clean condition. If these conditions are not met Darebin's Environmental Health officers may ask you to stop using or remove your worm farm. Let us know if you want to use this option, as we may be able to offer some support.

PAID SERVICE

CORIO WASTE MANAGEMENT

Commercial-scale collection and composting of coffee grounds and other organic waste.

coriowm.com.au

Contact sustainable.business@darebin.vic.gov.au if you want to start using one of these organic waste recycling options.

PAID SERVICE

REWASTE

Commercial food waste digester and energy generator.

Established by Yarra Valley Water with facilities in Wollert and Lilydale, they take food waste and use anaerobic digesters to create methane, which powers an electrical generator. Residual waste (digestate) is a nutrient-rich resource.
